

Question:

Quickly Checking User-Defined Values (UDV) and Fields (UDF)

How can I quickly check if a User-Defined Value (UDV) has been set up for a specific column/field, or verify the properties of a User-Defined Field (UDF)?

Answer:

1. Navigate to the Field:

Go to the specific document or master data window in SAP Business One.

Place your cursor in the field (column or cell) that you want to inspect.

2. Use the Shortcut:

Press the keyboard combination: Shift + Alt + F2
